## LISTING OF THE CLAIMS

- 23. (Currently Amended) A process for producing a set setting an expanded foodstuff, comprising the steps of passing a soft an expanded foodstuff composition, which is in a plastic state and is therefore capable of further expansion or contraction, at a first temperature and a first pressure into a setting region at a second temperature, said second temperature being lower than said first temperature; and cooling and setting said soft expanded foodstuff composition which is to be set in the setting region at a second pressure which is lower than said first pressure, whereby to produce a set expanded foodstuff.
- 24. (Previously-Presented) A process as claimed in claim 23, wherein the first temperature is in the range of 70 to 150°C.
- 25. (Previously-Presented) A process as claimed in claim 23, wherein the first pressure is substantially atmospheric pressure.
- 26. (Previously-Presented) A process as claimed in claim 23, wherein the second temperature is in the range of 10 to 50°C.
- 27. (Previously-Presented) A process as claimed in claim 23, wherein the second pressure is in the range of  $2 \times 10^4$  to  $7 \times 10^4$  Pa.
- 28. (Previously-Presented) A process as claimed in claim 23, wherein the setting region is substantially maintained at the second temperature and the second pressure.
- 29. (Previously-Presented) A process as claimed in claim 23, wherein the foodstuff composition is carried through the setting region by a belt conveyor.
- 30. (Previously-Presented) A process as claimed in claim 23, wherein a chemical expanding agent is included as an ingredient of the composition.

Appl. No. 09/889,019 Amendment dated July 28, 2003 Response to Final Office Action of March 28, 2003

- 31. (Previously-Presented) A process as claimed in claim 23, wherein expansion is at least partially effected by application of heat and/or by reduction of pressure.
- 32. (Previously-Presented) A process as claimed in claim 23, wherein the foodstuff composition is a confectionery composition.
- 33. (Previously-Presented) A process as claimed claim 23, wherein the foodstuff composition is subjected to a forming procedure, in which the foodstuff composition is formed into pieces of a desired shape.
- 34. (Currently Amended) A process as claimed in claim 23, wherein the soft expanded foodstuff composition to be set is formed by extrusion.
- 35. (Currently Amended) A process as claimed in claim 34, wherein the extruded soft expanded foodstuff composition to be set is cut into pieces after extrusion and is formed into balls by tumbling, during which procedure the expanded foodstuff composition is heated to the first temperature prior to being passed into the setting region.
- 36. (Currently Amended) A process for producing a set setting an expanded foodstuff, comprising the steps of passing a soft-foodstuff composition which may be is in at least a partially expanded condition and in a plastic state and is therefore capable of further expansion or contraction and which contains a vaporisable expanding agent, at a first temperature and a first pressure into a setting region at a second temperature, said second temperature being lower than said first temperature; and cooling and setting said soft foodstuff composition which is to be set in the setting region at a second pressure which is lower than said first pressure so as to expand or further expand the foodstuff composition by evaporation of the vaporisable expanding agent and produce a set expanded foodstuff.
- 37. (Previously-Presented) A process as claimed in claim 36, wherein said vaporisable expanding agent is selected from supercritical carbon dioxide or nitrogen, or water.

Appl. No. 09/889,019 Amendment dated July 28, 2003 Response to Final Office Action of March 28, 2003

- 38. (Previously-Presented) A process as claimed in claim 36, wherein the first temperature is in the range of 70 to 150°C.
- 39. (Canceled)
- 40. (Previously-Presented) A process as claimed in claim 36, wherein the second temperature is in the range of 10 to 50°C.
- 41. (Previously-Presented) A process as claimed in claim 36, wherein the second pressure is in the range of  $2 \times 10^4$  to  $7 \times 10^4$  Pa.
- 42. (Previously-Presented) A process as claimed in claim 36, wherein the setting region is substantially maintained at the second temperature and the second pressure.
- 43. (Previously-Presented) A process as claimed in claim 36, wherein the foodstuff composition is carried through the setting region by a belt conveyor.
- 44. (Previously-Presented) A process as claimed in claim 36, wherein a chemical expanding agent is included as an ingredient of the composition.
- 45. (Previously-Presented) A process as claimed in claim 36, wherein expansion is at least partially effected by application of heat and/or by reduction of pressure.
- 46. (Previously-Presented) A process as claimed in claim 36, wherein the foodstuff composition is a confectionery composition.
- 47. (Previously-Presented) A process as claimed claim 36, wherein the foodstuff composition is subjected to a forming procedure, in which the foodstuff composition is formed into pieces of a desired shape.

Appl. No. 09/889,019 Amendment dated July 28, 2003 Response to Final Office Action of March 28, 2003

48. (New) A process for setting an expanded foodstuff, comprising the steps of passing a foodstuff composition which is in at least a partially expanded condition and in a plastic state and is therefore capable of further expansion or contraction and which contains a vaporisable expanding agent, at a first temperature and substantially atmospheric pressure into a setting region at a second temperature, said second temperature being lower than said first temperature; and cooling and setting said foodstuff composition which is to be set in the setting region at a pressure which is lower than atmospheric pressure so as to further expand the foodstuff composition by evaporation of the vaporisable expanding agent and produce a set expanded foodstuff.
